

Transportation and Mobility meeting 07/30/25

Completed roll call

Approve minutes, Set and approve agenda

Action items list going around the room.

Contact with the city forester about tree pruning and areas surrounding signs/ blocking stop signs and crosswalks. Options for ways to report these things? A proposed option was through people like the garbage trucks who are driving the streets every week. Contacting to see if we can get attendance at a meeting to discuss.

Handicap street parking discussion as a group. Discussed drop off areas in cedar Lee district, and how handicap spots have been slowly removed in some ways. What is the balance between drop off areas and actual parking?

Gail discussed the sidewalk initiative for the budget. City contracting our concrete company that can work with property owners to redo areas of sidewalks. Options for low income for city to support this.

Fern: education aspect of the committee. An option is the Heights Observer, writing about the accessibility issues and sharing it with the broader public.

Caledonia Roundabout Improvements - Chris (current: waiting for city water project in area to complete before circling back with Clinkscale)

Director Clinkscale hopefully attending next meeting with plans for next years resurfacing. Emailing to follow up - Aaron

Chris interested in making more formality for sending minutes and action items within a week after meeting. And notifying by Monday before about absences, in normal circumstances.

Also possibly sending agenda a week before.

Can addy print the draft agenda before meeting? Gail says yes.

Idea of chair calling on people to speak about specific agenda items and then have separate open talk? Might kill discussion.

Make sure we're checking back in about things.

State that it's the co-chair responsibility to reach out to any departments. Then in future new city administrator would take over that responsibility.

Meeting adjourned.
