Describe the present and original (if known) physical appearance

The Heights Rockefeller Building is a large J-shaped structure located on the northeast corner of Mayfield and Lee roads. It has a total street frontage of 579 feet, of which 193 feet is on Lee Road, 238 on Mayfield Road, 70 on Bolton Road, and two 39-foot diagonal sections at the corners. The building contains shops at ground level, and apartments and offices on the upper floors. There are also apartments on the ground floor of the Bolton-Lee corner of the building, which contains the apartment entrance.

The building is French Norman in style, freely interpreted. It consists of a $3\frac{1}{2}$ -story main block and two 2-story wings. The latter vary in height and setback, giving it the appearance of a Norman village. The building is of concrete, brick, and tile construction, and has a full basement with concrete block foundation. There are metal casement windows throughout.

The main block, at the Mayfield-Lee corner, features a steep hipped roof of slate with hipped-roof dormers, stone quoins, and a gabled entrance bay faced with tapestry brick and oak half-timbering. The entrance is contained in a recessed Tudor arch of sandstone.

The ground floor of the building is of local sandstone. Upper floors incorporate brick laid in English bond, tapestry brick with oak half-timbering, and wavy-edged cedar siding. The two wings have flat roofs concealed behind hipped parapets of slate; skylights admit light and air to hallways and (in the apartments of the Lee Road wing) bathrooms. Projecting bays with gabled roofs mark the principal entrances to the building and, in the Mayfield Road wing, to the second-floor bank. These, together with the irregular roofline and rich use of materials, give the building great visual variety. The original storefronts are intact. The present signage on the Mayfield Road wing was added later.

A paved parking area 250 feet long and 50 feet wide, located between the street and the building on Mayfield Road, is an original feature of the building. At the rear, the building encloses a pleasantly landscaped courtyard with paved circular drive and a small parking area. On the northeast corner of the parcel is a brick 15-car garage with caretaker's apartment above. The two-story central block has wavy-edged cedar siding, a hipped roof of slate, and hipped-roof dormers.

Of particular merit inside is the original second-floor bank, reached by a broad stairway from a small ground-floor lobby. It features hand-painted, beamed ceilings, iron chandeliers, oak woodwork, a large carved stone fireplace, and virtually all of its original furnishings, including banking tables with their slag-glass lamps. Elsewhere inside, the apartments remain virtually unaltered while many of the offices have been remodeled, as has the main lobby.

The Heights Rockefeller Building is located at a busy commercial cross-

roads. Two commercial buildings of the same period (though not of the same style) occupy the southeast and southwest corners of the Mayfield-Lee intersection, while a modern office building (ca. 1950s) occupies the northwest corner. Diagonally across Mayfield Road is The Civic (1928), formerly the Temple on the Heights, the first Jewish synagogue in Cleveland Heights. A parking lot and home for the aged adjoin the building on the east side.

Builder/Architect Andrew J. Thomas

Statement of Significance (in one paragraph)

Built in 1930 by John D. Rockefeller, Jr., the Heights Rockefeller Building is significant for its association with an unusual chapter in the development of suburban Cleveland and because it represents one period's vision of advanced standards of community planning. The building was intended to serve as the commercial heart of Rockefeller's Forest Hill real estate development, located on the site of his family's longtime summer home. Designed by New York architect Andrew J. Thomas, Forest Hill was conceived as a model village of 600 homes. An inn, country club, business block, and apartment houses were also envisioned, all in the French Norman style. Only 81 houses (located nearby in East Cleveland) and this so-called "community store building" were built before the project was abandoned as a financial failure. Apart from its history, the Heights Rockefeller Building is significant as a fine example of French Norman architecture, a style adopted by many architects of the era as they sought historical references for their work. The building's second-floor bank, still occupied by the original tenant, is particularly notable.

(Note: The Heights Rockefeller Building is geographically separate from the Forest Hill houses, which are not included in this nomination.)

History

The Heights Rockefeller Building was erected in 1930 by the Abeyton Realty Corporation under the direction of John D. Rockefeller, Jr. (1874–1960). It stands on a portion of Forest Hill, the Rockefeller family's longtime summer home.

In 1873 John D. Rockefeller, Sr. purchased a large tract of land bordering Euclid Avenue in East Cleveland and gradually added to it until he had acquired several hundreds of acres stretching from East Cleveland into Cleveland Heights. Although Rockefeller established his legal residence in New York in 1884, he returned with his family to Cleveland every spring to live at Forest Hill until late fall. It is said that John D. Rockefeller, Jr.'s generous support of conservation projects stemmed from his boyhood days at Forest Hill, where he developed his lifelong love of nature.

The Rockefeller summer house was destroyed by fire in 1917, and in 1923 ownership of the Forest Hill estate was conveyed to the younger Rockefeller. Under his custody, the estate was broken up, portions of it providing sites for a school and hospital and, later, Forest Hill Park.

In the late 1920s, in collaboration with architect Andrew J. Thomas (1875–1965), Rockefeller undertook a large housing project on that portion of

the estate east of Lee Road. Thomas drew up plans and produced models for a village containing 600 middle-priced homes in the French Norman style. A business block, apartment houses, and a country club and inn were also envisioned as part of the development. Abeyton Realty Corporation, with James C. Jones serving as local manager, supervised the project. In September 1930, with 81 houses finished or under way and the \$750,000 Heights Rockefeller Building under construction, the project was finally announced to the public.¹

Andrew J. Thomas's vision of a model village included curving streets, garages built out of sight in the foundations of the houses, and underground wiring. He chose the French Norman style, according to one architectural reporter, "because it possesses both style and character without too much insistence on any period or nationality, and because it affords a ready opportunity for the use of permanent and interesting building materials." The architect is said to have developed a special brick, fired in a range of soft, warm tones, for the project. He used it in combination with Ohio sandstone, solid oak half-timbering, wavy-edged cedar siding, hand-split shakes, and slate.²

Thomas's primary and lifelong interest was housing. Self-educated, he designed millions of dollars worth of (mostly low-income) housing projects for John D. Rockefeller, Jr. and popularized the garden apartment. During a 75-year career, he designed model projects in Bayonne, N.J., Long Island City, Queens, Brooklyn, Manhattan, and the Bronx. The Forest Hill development is believed to be his only work in Ohio.

The opening of the Cleveland Trust Company bank and the establishment of headquarters of the Abeyton Realty Corporation in the Heights Rockefeller Building on May 2, 1931, marked the formal opening of the building, although several apartments already were occupied. Negotiations with other tenants reportedly were still under way, and city directories confirm that a substantial portion of the building, including several storefronts, remained vacant well into the decade. In addition to the Cleveland Trust (now Ameritrust) Company, early tenants included the Jack Frost Beauty Shop (still in business there) and a branch of the Kroger grocery store. Streich Pharmacy occupied a store in the Mayfield Road wing of the building beginning in the late 1930s. (It closed only recently.)

Financially, Rockefeller's Forest Hill project was less than successful. By July 1931 only five of the development's 81 homes had been sold and Rockefeller's plans were in abeyance. Fortune magazine judged the project a failure, "not because it is badly planned, but because it is a New York

project located in Cleveland"; young executives at whom Forest Hill was targeted, the magazine explained, could find better values elsewhere in a city where real estate prices were far lower than in New York. The houses in Forest Hill were priced out of reach of Cleveland's middle class, and those who could afford them saw greater architectural diversity and more accessible public transportation in the Van Sweringen's nearby development of Shaker Heights.³

Yet if Fortune judged Forest Hill a failure, architectural journals of the day did not. "Mr. Thomas with his ability as a designer has put architectural charm into the community," Architectural Record reported in April 1931.⁴ And according to Matlack Price, writing in Architecture, Forest Hill represented "the architect's able contribution to advanced standards of community planning." Price further commented that the architect had achieved an important balance between "unity versus chaos; variety versus monotony."⁵

Completion of 81 houses and the community store building⁶ marked the end of Rockefeller's venture at Forest Hill. The development was eventually sold and completed between 1940 and 1950 in a contemporary style. In 1939 the Heights Rockefeller Building was sold to Elizabeth G. Augustus; in 1954 to Jay W. Barber Inc.; and in 1968 to the Cleveland Trust Company acting as trustee for the Medusa Salaried Pension Fund (Medusa Portland Cement Company). The present owner, Nighttown Inc., purchased the building in 1984. John Barr, president of Nighttown, is a prominent restauranteur in Greater Cleveland. Currently all but one of the building's 12 apartments are occupied, while business tenants include an architect, photography studio, accountants, attorneys, medical and advertising offices, a florist, bank, and the Cystic Fibrosis Foundation. A new restaurant is planned for two currently vacant storefronts in the Mayfield Road wing.

³ "Mr. Rockefeller Returns to Cleveland," Fortune, July 1931, p. 31.

⁴ "Forest Hill Subdivision, Cleveland, Ohio," Architectural Record 69 (April 1931): 346.

⁵ Price, "Forest Hill," pp. 135, 136.

⁶ No name appears on the building, and newspaper and magazine articles of the period referred to the building generically as the "community store building" or "business block." In city directories, however, it appears as the "Heights Rockefeller Building" beginning in the 1930s.

Dear Carol:

Enclosed are seven new National Register nominations. All of the appropriate notification procedures have been followed for these new submissions. Please note that we have received letters waiving their right to comment from the property owner and the City of Lima for the Barr Hotel and the property owner and the City of Circleville for St. Philip's Episcopal Church. Please do everything possible to expedite the listing of these two nominations. Please give a substantive review to St. Joseph's Catholic Church.
